

SmileTrain

School is a remarkable place – one that shapes a child's sense of belonging. But for many children with untreated clefts, the classroom can feel anything but welcoming.

In Smile Train's latest PSA, **School Smiles**, we meet Victoria. With a bandage covering her cleft and her eyes fixed on the floor, she longed to blend into the background. After receiving cleft surgery made possible by Smile Train, Victoria discovered her voice, her smile, and the courage to take her place in the world.

Smile Train partners with local medical experts to provide free, high-quality cleft surgeries and essential support, giving children the strong foundation they need to learn, grow, and thrive. Their commitment ensures that students like Victoria can step into the classroom with dignity, confidence, and hope for what lies ahead.

Air **School Smiles** today and help create brighter futures, where every child can step into school with good health and a smile that shines.
