

Dear PSA Directors,

In sub-Saharan Africa there is only one doctor for every 100,000 people, leaving people with devastating medical conditions without the healthcare they desperately need.

Mercy Ships is launching its newest state-of-the-art medical ship, ***Global Mercy***, to meet the demands of these impoverished areas. Help Mercy Ships provide life-changing surgery and care to people in need by airing their new public service announcement, ***Global Mercy***, with your audiences.

Thank you for your support,

Laura Rebouche
U.S. National Media Relations Director
