

American  
Heart  
Association®

During a routine ultrasound, doctors determined that baby Finn's heart did not have any chambers and there were abnormal connections. For Finn to survive after he was born, he needed multiple surgeries and procedures.

Finn's family is grateful to the American Heart Association for their lifesaving research and medical breakthroughs that gave him a second chance at life. Join the fight to help prevent death from heart disease and stroke by airing this PSA with your audiences.
