

## Mercy Ships is bringing **A Wave of Hope**

Mercy Ships is bringing a wave of hope and healing to those who need it most with the launch of their new ship, Global Mercy. As the world's first purpose-built civilian hospital ship, the Global Mercy allows patients with nowhere else to go to receive the life-changing care they need.

This new addition to the Mercy Ships fleet will more than double their capacity to provide free surgeries and medical training in the world's most desperate places. Support Mercy Ships' inspiring mission with your audiences by sharing their new PSA today.

Globally, 5 billion people lack access to safe surgical care. Without access to surgery or medical care, children continue to struggle with bent limbs, painful tumors shadow people's lives, and treatable blindness diminishes joy. But thanks to friends like you, there is hope. Thanks to our volunteers, friends, and corporate partners for over 40 years, Mercy Ships has provided free surgical care to those in need.

Now, we have the opportunity to provide hope and healing to even more children and families. Our newest vessel, the *Global Mercy*, is the world's first and largest civilian hospital ship. Based on input from volunteer crew and decades of experience in the field, the *Global Mercy* was designed to meet the unique needs of our patients and is equipped with world-class medical technology. As this custom-built ship launches, our need for talented, compassionate volunteers will double — from medical personal to teachers to IT technicians and more.

With the help of dedicated volunteers, this medical vessel will more than double our capacity to deliver safe surgical care to people in need and provide medical training in the countries we serve. That means more lives saved and *more lives transformed*.

We all know what shame is — what pain feels like. But compassion and mercy connect us as people. Thank you for joining us in our mission of hope and healing.
